ELECTRIC GRIDDLE PLATE SMOOTH MILD STEEL TOP

PRODUCT DESCRIPTION

Stainless steel frame. Athermic thermoset plastic knobs.

Heating achieved through **tubular heating elements** placed on the plate bottom.

Thick mild steel cooking surface. Rounded edges and welded splash guard for **easy cleaning**.

Moulded stainless steel work surface sloping towards the fat drain that is connected to a large dip tray under the cooking surface.

Equipped with a fat drain drawer.

Two different cooking areas, each provided with its temperature controls. **1/2 smooth and 1/2 grooved plate.**

Provided with a thermostat, which enables the temperature to be regulated between **120°C and 310°C**. Manually-reactivating safety thermostat.

Accessories available on demand.
